

BORN Ontario: Postpartum Mother & Postpartum Child – Training Guide

DATA ENTRY: POSTPARTUM MOTHER ENCOUNTER

Refers to the maternal postpartum course of care from one hour postpartum to discharge from hospital.

- Only one Postpartum Mother Encounter per woman per pregnancy is entered
- The encounter can be initiated by:
 1. Performing a Patient Search to locate the mother's record **OR**
 2. Creating a Patient (if patient is not in system) **OR**
 3. Continuing data entry if you are already in mother's record (i.e. you've just entered the Birth Mother Encounter).

Need help?

1.  Click "?" for page level help
2. Click on the data element to receive the definition

Postpartum

Summary

Postpartum Complication:

Postpartum Breastfeeding Support: After initial breastfeeding, mother was assisted with breastfeeding within 6 hours post birth
 Frequent skin to skin
 Hand expression of breastmilk

Healthy Baby Healthy Children (HBHC) Screen:

Maternal Outcome:

Comments:

- Review pre-populated information to confirm accuracy. If inaccurate – update.
- Enter information from left to right.
- Multi-select- Select all that apply.
- In box multi-select -Scroll and select all that apply.
- “Submit” when the encounter record is complete.
- Correct conflict errors if flagged and resubmit.

DATA ENTRY: POSTPARTUM CHILD ENCOUNTER

Refers to the routine postpartum course of care experienced by the child from one hour following birth through to discharge from hospital.

- A single Postpartum Child Encounter is entered within one organization.
- The easiest way to create a postpartum child encounter is from the child's navigation tree. You can also reach the child's record from the mother's navigation tree (you can toggle between the mother and child record).
- A postpartum child encounter can also be created by creating a patient (if the child is not in system).
